EXPERIENCE

IT Operations & Asset Management Lead

Phase V Fulfillment | *Sept 2025 – Present*

- Serve as the sole onsite IT lead supporting device lifecycle management, infrastructure, warehouse technology operations, and end-user support.
- Configured, repaired, and deployed 700+ devices across 30+ client environments while maintaining deployment accuracy.
- Diagnosed and resolved hardware, software, networking, printer, and operating system issues, minimizing operational downtime.
- Developed and maintained Electron-based applications that automated workflows, streamlined authentication, and improved operational efficiency.
- Supported ShipHero Tap2Pack implementation, device mapping, workstation deployment, and infrastructure support.

AI Data Specialist & AI Prompt Engineer

RWS & Outlier AI | Contract | *Sept 2025 – Mar 2026*

- Contributed to 6+ AI training, evaluation, and quality assurance projects.
- Evaluated AI-generated outputs and identified quality and instruction-following issues.
- Performed annotation and assessment tasks supporting model training and validation.
- Tested AI-generated text, image, and audio content to improve consistency and reliability.

TECHNICAL PROJECTS

Warehouse Workflow Automation Application

- Enhanced and maintained an Electron-based workflow application used across warehouse operations.

Internal Timesheet Management Application

- Developed an Electron-based application for billable-hour tracking and reporting.
